PROFILE

I'm self-motivated, creative, and a good team player, my problem-solving skills are high, and on top of that, my experience is quite big (5 years of development in NodeJS, and a total of 4 years of backend engineering)

As a matter of fact, I know a lot of low-level development (such as Assembly and C) and networks which makes me a better backend engineer, I also have dealt with many Linux servers and dockers.

All of my programming skills are listed here: <https://sigron.me>

---

EMPLOYMENT HISTORY

Oct 2021 — Sep 2022 Backend Developer & Fortnite tournaments manager, NOM eSports Tel Aviv

- Successfully developed a tournament registration website for this company, including an option to export entries to Google spreadsheet and security layers in the backend.

---

EDUCATION

Oct 2021 — Present Magshimim

Magshimim is Israel's national cyber education program (<https://rashi.org.il/en/programs/magshimim/>)

- Successfully finished the first year, and I'm currently nearing the end of the second year.
- Managed to complete over 6 projects such as an online Chess game, Gallery (console-based), Bulls and Cows, anti-virus, movie/gif maker (programming class), and in Networking I've managed to operate as a pen-tester and identify security vulnerabilities.
- Successfully learned advanced C++, and basic C, Python, and Assembly.
