Harel Sigron, Backend Developer

Tlamim, Israel, 0585921852, arel1234123@gmail.com

LINKS	Personal Website			
PROFILE	I'm self-motivated, creative, a good team player, my problem-solving skills are high, and on top of that, my experience is quite big (4.5 years of development in NodeJS, and a total of 4 years of backend engineering)			
	As a matter of fact, I know a lot of low-level development (such as asm and c) and networks which makes me a better backend engineer, I also have dealt with mar Linux servers and dockers. All of my programming skills are listed here: https://sigron.me			
Oct 2021 — Present	Backend Developer, NOM eSports			Tel Aviv
	 Successfully developed tournament registration website for this company, including options to manage and filter entries, and security layers in the backend.
