Harel Sigron, Backend Developer

Tlamim, Israel, 058-592-1852, harel@sigron.me

LINKS

Personal Website

PROFILE

I'm self-motivated, creative, a good team player, my problem-solving skills are high, and on top of that, my experience is quite big (4.5 years of development in NodeJS, and a total of 4 years of backend engineering)

As a matter of fact, I know a lot of low-level development (such as asm and c) and networks which makes me a better backend engineer, I also have dealt with many Linux servers and dockers.

All of my programming skills are listed here: https://sigron.me

---

EMPLOYMENT HISTORY

Oct 2021 — Present

Backend Developer & Fortnite tournaments manager, NOM eSports   Tel Aviv

- Successfully developed tournament registration website for this company, including options to manage and filter entries, and security layers in the backend.

EDUCATION

Oct 2021 — Present

Magshimim

Magshimim is Israel's national cyber education program (https://rashi.org.il/en/programs/magshimim/)

- Successfully finished the first year and I'm currently on a summer vacation.
- Managed to complete 4+ different projects such as Bulls and Cows, anti-virus, movie/gif maker (programming class), and in Networking I've managed to operate as a pen-tester and identify security vulnerabilities.
- Successfully learned C and Python.
